

Sprint 1 Report - CSE 115A

BSOE Course Scheduling Web App

Team Name: Team Team

Harmeet Sohal - Scrum Master

October 19, 2021

- **Actions to stop doing:**

The team should stop meeting solely online via zoom because the team feels that in person meetings would be more effective and beneficial.

- **Actions to start doing:**

The team should schedule more group sessions as these times would force the team to get together and to work on things that need to be done. Forcing the team together will allow for more collaboration and communication which will help things move forward.

The team needs to be stricter and have all members attend scrum meetings so that the whole team can be kept up to date on things being done and things that are already done.

- **Actions to keep doing:**

The team wants to keep using slack for messaging and general communication as it seems to be getting everybody's attention and the team is able to communicate well with each other.

The team wants to keep working together via zoom when designing Sprint plans and other documentation regarding the project.

- **Work completed/not completed:**

Completed:

User story 1: As a developer, I want to define a data structure for a course. User story 5: As a developer, I want to have pseudocode for the logic that decides whether a class can be taken.

Not Completed:

User story 3: As a developer, I want a drop down menu showing me a list of courses for the student to select as taken, so that it can filter the data for classes still needed.

In-Progress:

User story 2: As a developer, I want to create a database of classes, so that I can easily access, retrieve, and modify data.

User story 4: As a student I want to be able to have a list of classes that I am able to take to fulfill my requirement.

- **Work completion rate:**

We completed 2 user stories this sprint.

We estimate that we completed 35 ideal work hours during this sprint.

The sprint lasted for 14 days.
