Team Name: TEAM TEAM

Date: 11/30/2021

Team Members: Andriy Bondar, Arthur Weimholt, Shiyuan Huang, Nathanael Chow, Harmmeet Sohal

Login Page

- When you first launch our web app, you will see the login page
 - Create an account if you don't already have one
 - Login if you already have one
 - Admin can also log in with his own account to see the admin view where he can add classes and prerequisites.

Home Page

- Home page shows a table in which you can input classes taken and generate course suggestions.
- Top right menu bar lets you log out and view your profile to make changes.
- To add a class, click the edit button and choose a course from the list.
- To remove a class, click the delete button next to the course.
- Once done inputting classes, scroll down and you will see some info and buttons
 - Total Units shows you how many units you have completed with your inputted schedule
 - The Generate Schedule button will recommend you a course schedule for the next term
 - The CS Requirements button will give you some info on the requirements for the CS Major.
 - The About button will bring you to a page with some info on the website.
- Any info inputted in the schedule will be tied into your account and will be retrieved the next time you log in.

Admin Page

- If an admin logs in with their own credentials, they will be taken to the admin page with a different view than the student view.
 - Email: a@gmail.com and Password: 123456
- The admins can view all classes currently in the database along with all relevant info on the classes.

- These classes can be edited or even deleted.
 - Classes can also be added.
- The admin can also view the requirements associated with the various classes.
 - The admin can add, delete, or edit these requirements.
