Installation Guide

Product Name: BSOE Course Scheduler WebApp
Team Name: TEAM TEAM
Date: 11/30/2021
Team Members: Andriy Bondar, Arthur Weimholt, Shiyuan Huang, Nathanael Chow, Harmeet Sohal

Steps to download BSOE Course Scheduler Web App:

1. Head on over to: https://learn-py4web.github.io/
2. Locate and click on: "Unit 1: Installing py4web, and editing code"
3. Click on "py4web" which will take you to the py4web website.
4. Here click on the "Source" button. This will take you to the py4web GitHub page.
5. Next, watch and follow the video under the Unit 1 section named "Installing py4web from git."
6. Once everything is up and running, download our app and all of the code files onto your desktop.
7. Next, you want to locate the "py4web" folder in your computer. Once found, head on over to "py4web/apps". This is where you will drop the folder containing the BSOE Web App into.
8. Next open Terminal and type "./py4web.py run apps".
9. Find the URL of your dashboard and copy/paste this into your browser.
10. In your browser you may have to enter a password. Please enter your password at this moment.
11. Now you should be able to see the "py4web Dashboard". Here you can see the inner workings of py4web.
12. Next, click on "Installed Applications" and click on the folder you had put into "py4web/apps" previously.
13. Now click on "Routes for py4web" and you should see our Web App open up in a new tab!
